FIBER EXTRACTOR

*This machine is popularly known as T Sorter. The machine is very simple single deck Sorter as against multideck machines. The sorter can be used with or without fibre extracting attachment.*

- A single deck consisting 5 or 6 S.S.Mesh of user choice sort the Tea. The Tea fed through hopper travels over the mesh to be sorted in different grades.
- The PVC Rollers fitted over the tray take care of fibre extraction.
- The motion to tray comes through a single connecting rod to deck frame which is supported by spring leg. The eccentric and drive shaft are provided with heavy duty bearings.
- This machine is designed with light but sturdy and well aligned frame work with a strong chassis made of channel Iron. As a result it is very smooth and noiseless.
- This machine has completely changed the Sorting aspect of CTC tea. The producer can use one or more machine and can completely conveyerized the CTC Sorting process.

## Specifications

	Feed End	Discharge End
Height	1415 mm (with Hopper)	580 mm
Length	3670 mm	
Width	Tray 1086 mm	1200mm
Power	1 H.P.	1440 R.P.M
Sorting Capacity	400 Kg.	
Mesh Trays	5 (Five)	6 (Six)
Roller	4 (Four)	5 (Five)
